About This Guide

Yeastar P-Series Cloud Edition supports the integration with HubSpot CRM, which allows your HubSpot CRM users to get all the call details right in their CRM entries while keeping the voice traffic in Yeastar P-Series Cloud Edition. This topic describes the requirements, key features, and terminologies related with the integration.

Requirements

HubSpot CRM

The integration with HubSpot CRM is supported on the following editions:

- Free CRM tool
- Starter plan
- Professional plan
- Enterprise plan

PBX server

Firmware: 84.7.0.17 or later

Key features

The integration of Yeastar P-Series Cloud Edition and HubSpot CRM provides the following key features:

Click to Call

Users can launch calls by a single click on the detected numbers from HubSpot CRM via Yeastar Linkus Web Client.

Note:

This feature requires users to install '[Yeastar Linkus for Google](#)' Chrome extension and set up Linkus Web Client to work with the Chrome extension.

Call Popup

Automatically bring up the contact's profile on the web browser when users (with their Linkus Web Client or Linkus Desktop Client logged in) receive an inbound call from a CRM contact.

Call Journal

All the call activities get logged automatically to HubSpot CRM when a user ends calls with CRM contacts.

Contact Synchronization

Synchronize CRM contacts to an associated PBX phonebook when receiving inbound calls from HubSpot CRM contacts.

Automatic Contact Creation

A new contact will automatically be created in CRM for unknown inbound calls or outbound calls.

Terminologies

The following table lists the terminologies of the HubSpot CRM integration.

Table 1.

Term	Description
Developer account	<p>An app developer account is used to create and manage apps, integrations, and developer test accounts. However, app developer accounts and their associated test accounts can NOT sync data or assets to or from another HubSpot account.</p> <p>Tip: You can click here to sign up a HubSpot developer account.</p>
Standard account	<p>A standard account is the most common type of account. It's where you'll find all the tools, features, and settings included with your HubSpot plan.</p> <p>Tip: You can click here to sign up a HubSpot standard account.</p>
Super Admin	The system administrator that can access all the data and manage all the users in HubSpot CRM.
User	The corporate staff who can only access specific data based on assigned permissions (roles).
PBX extension	The extension number for each staff. The staffs can register the extension on a phone or on Linkus clients, and use the extension to make and receive calls.
Contact	The contact is an individual whose information is in your CRM database.
Company	The companies with which you have business dealings. Single or multiple contacts can be associated with a company.

Set up Hubspot CRM Integration

Create a CRM application on HubSpot

You need to create an application on HubSpot for integration using a developer account, and configure the authorization settings.

Prerequisites

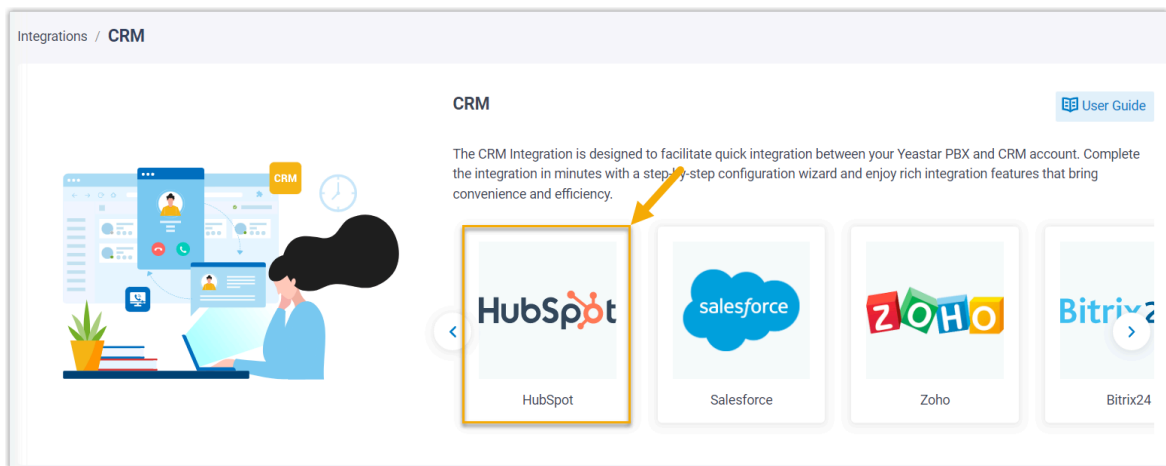

To create an application, you need a [developer account](#).

Procedure

- [Step 1. Get authentication information on PBX](#)
- [Step 2. Create and configure an application on HubSpot](#)

Step 1. Get authentication information on PBX

1. Log in to PBX web portal, go to **Integrations > CRM**.
2. Click **HubSpot**.

3. In the **Network** section, take note of the **Redirect URL** as you will use it later on HubSpot.

Note:

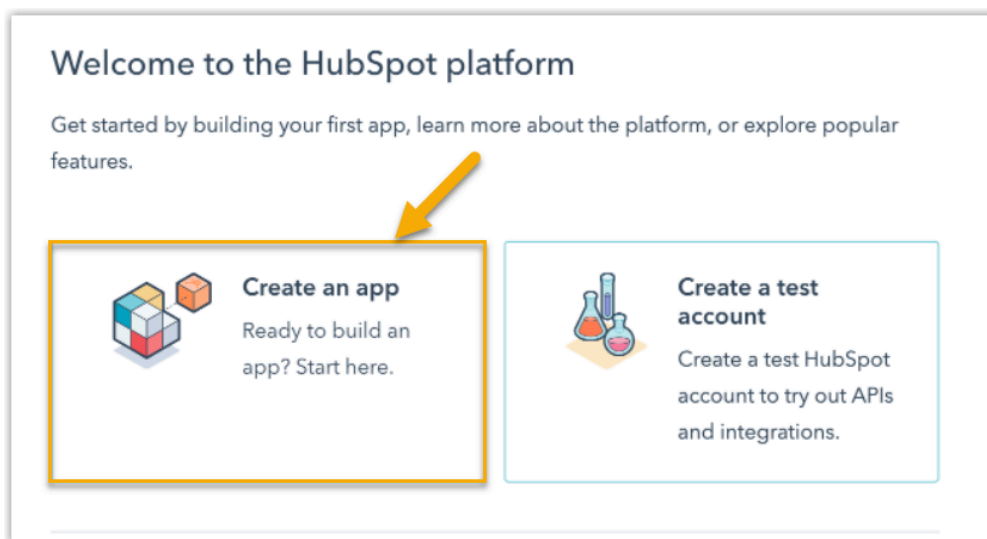

The **Homepage URL** is the domain name of your PBX, which is used to compose the **Redirect URL**.

<p>Homepage URL</p> <p>https://example.com</p>	<p>Redirect URL</p> <p>https://example.com/integration/callback/api/crm/hubspot/</p>
----------------------------------------------------------------------------------	--------------------------------------------------------------------------------------------------------------------------------------------------------------

Step 2. Create and configure an application on HubSpot

1. Log in to your [HubSpot developer account](#).
2. Select **Create an app**.

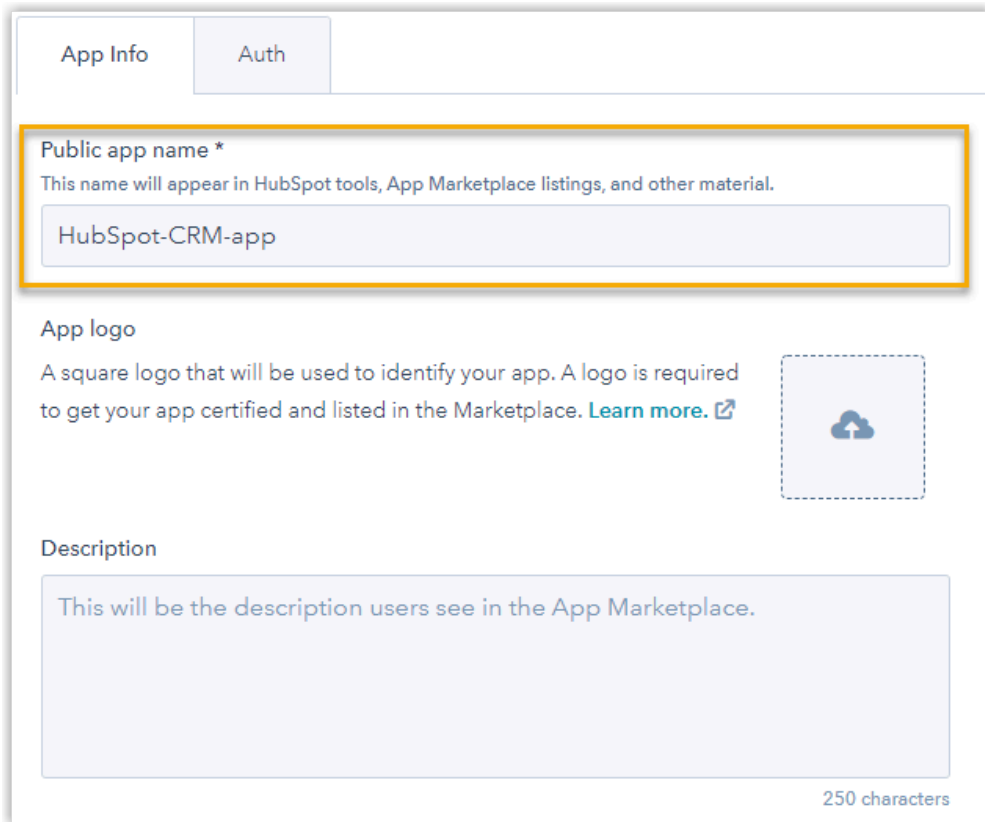

Tip:

You can also proceed on **Apps > Create app**.

3. In the **App Info** tab, configure basic information of the application.

The screenshot shows the 'App Info' tab of a HubSpot application setup. It features three main sections: 'Public app name', 'App logo', and 'Description'. The 'Public app name' field is highlighted with an orange border and contains the text 'HubSpot-CRM-app'. The 'App logo' section includes a dashed box with a cloud upload icon. The 'Description' section has a large text area with a '250 characters' limit indicator at the bottom right.

App Info | **Auth**

Public app name *
This name will appear in HubSpot tools, App Marketplace listings, and other material.

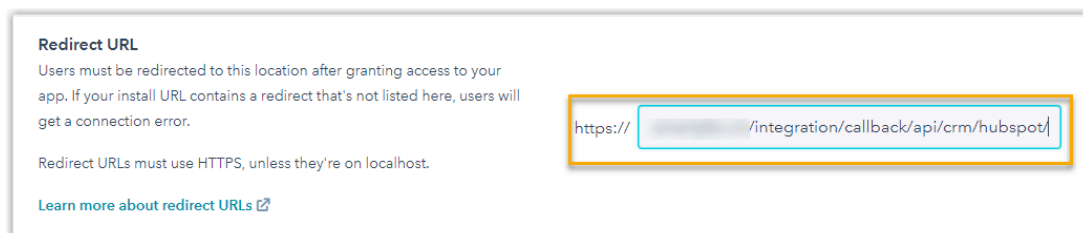

HubSpot-CRM-app

App logo
A square logo that will be used to identify your app. A logo is required to get your app certified and listed in the Marketplace. [Learn more.](#)

Description
This will be the description users see in the App Marketplace.

250 characters

- a. In the **Public app name** field, specify an application name, which will be used wherever your application is displayed for HubSpot users.
- b. **Optional:** Upload a logo and add descriptions for the application.
4. In the **Auth** tab, complete application authorization settings.
 - a. In the **Redirect URL** section, paste the [Redirect URL](#) obtained from the PBX.

The screenshot shows the 'Auth' tab of a HubSpot application setup. It features a 'Redirect URL' section with a text area containing the URL 'https://[redacted]/integration/callback/api/crm/hubspot/'. The text area is highlighted with an orange border. Below the text area is a link to 'Learn more about redirect URLs'.

Redirect URL
Users must be redirected to this location after granting access to your app. If your install URL contains a redirect that's not listed here, users will get a connection error.

Redirect URLs must use HTTPS, unless they're on localhost.

[Learn more about redirect URLs](#)

https://[redacted]/integration/callback/api/crm/hubspot/

- b. In the **Scopes** section, define the permissions of data access or operation in HubSpot for your application.
 - i. In the **CRM** drop-down list, select the following scopes.

CRM	Write	Read
crm.lists	<input type="checkbox"/>	<input type="checkbox"/>
crm.objects.companies	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
crm.objects.contacts	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
crm.objects.deals	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
crm.objects.owners		<input checked="" type="checkbox"/>
crm.schemas.companies	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
crm.schemas.contacts	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
crm.schemas.deals	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>

ii. In the **Standard** drop-down list, select the following scopes.

media_bridge.read	<input type="checkbox"/>
media_bridge.write	<input type="checkbox"/>
oauth	<input checked="" type="checkbox"/>
reports	<input type="checkbox"/>
sales-email-read	<input type="checkbox"/>
settings.billing.write	<input type="checkbox"/>
settings.users.read	<input checked="" type="checkbox"/>
settings.users.teams.read	<input checked="" type="checkbox"/>
settings.users.teams.write	<input checked="" type="checkbox"/>
settings.users.write	<input checked="" type="checkbox"/>
social	<input type="checkbox"/>

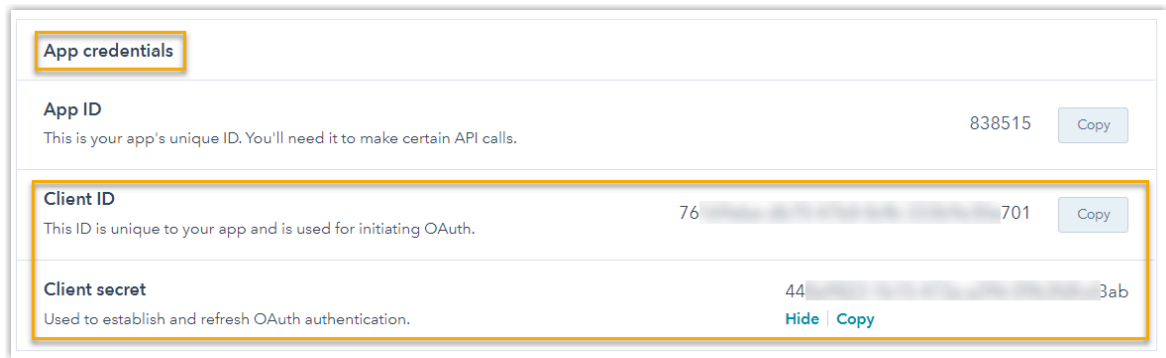

c. On the bottom column, click **Save**.

Result

The HubSpot CRM application is created. You can check and manage the application in the **Apps** page.

What to do next

- Go to the **App credentials** section in the **Auth** of the application to obtain the **Client ID** and **Client secret** for integration.

App credentials

App ID
This is your app's unique ID. You'll need it to make certain API calls. 838515 [Copy](#)

Client ID
This ID is unique to your app and is used for initiating OAuth. 76...701 [Copy](#)

Client secret
Used to establish and refresh OAuth authentication. 44...3ab [Hide](#) [Copy](#)

Integrate Yeastar P-Series Cloud Edition with HubSpot CRM

This topic describes how to integrate Yeastar P-Series Cloud Edition with HubSpot CRM.

Prerequisites

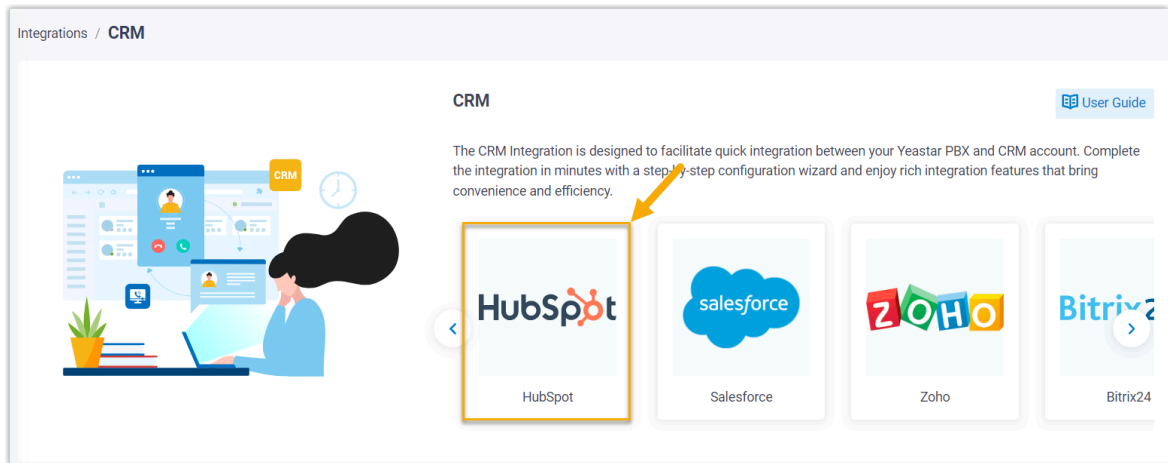

- [You have created a CRM application on HubSpot using a developer account.](#)
- You need a [standard account](#) with Super Admin privilege for the integration.

Procedure

- [Step 1. Make Authorization Request to HubSpot CRM](#)
- [Step 2. Associate HubSpot CRM users with PBX extensions](#)

Step 1. Make Authorization Request to HubSpot CRM

1. Log in to PBX web portal, go to **Integrations > CRM**.
2. Click **HubSpot**.

3. In the **Authorization** section, enter the application authorization information.

- **Client ID:** Paste the [Client ID](#) obtained from the created HubSpot application.
- **Client Secret:** Paste the [Client Secret](#) obtained from the created HubSpot application.

4. Click **Save**.

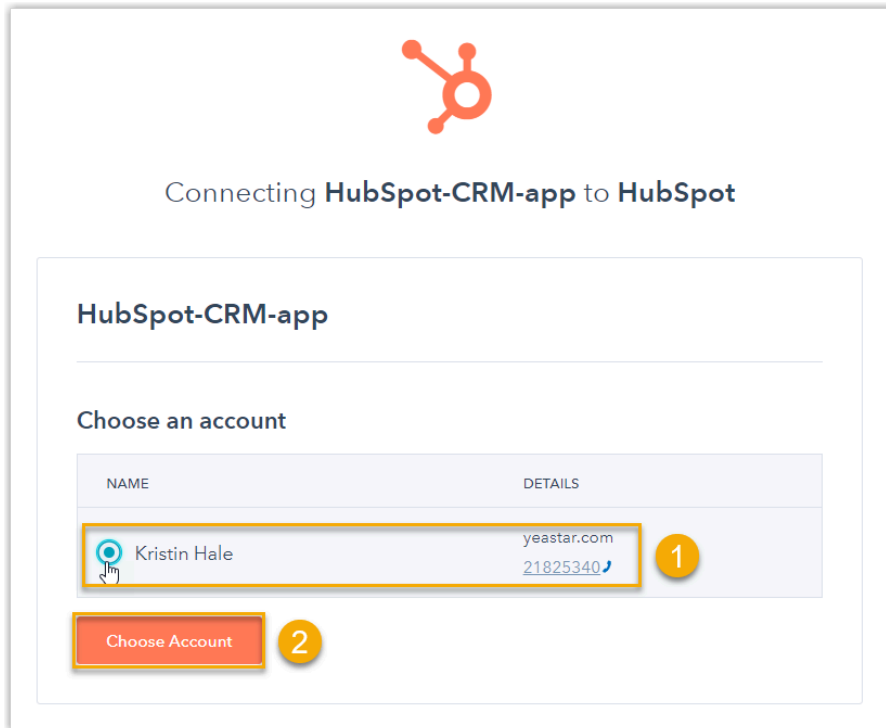

A new browser page is launched to prompt you to choose an account for integration.

5. Select a standard HubSpot account with Super Admin privilege, and click **Choose Account**.

Important:

Do NOT select a developer account, otherwise the integration would fail.

The page will then show the permission grant request of the application.

6. Check the permissions and click **Connect app** to proceed with the authorization.

Note:

You can safely ignore the warning stating that “You’re connecting an unverified app”, as this app is created by yourself.

If the authorization succeeds, the web page will display **Authorization succeeded!**.

On the PBX configuration page, a pop-up window displays the authentication result.

7. Click **OK** to confirm.

The **Status** field displays **Connected**, indicating that the HubSpot CRM integration is successfully set up.

Step 2. Associate HubSpot CRM users with PBX extensions

1. On the CRM integration page, click  beside the **HubSpot User** to synchronize the latest list of HubSpot CRM users.

HubSpot User 	Extension
Kristin Hale - kristinhale@sample.com	[None] ▼
Terrel Smith - terrelsmith@gmail.com	[None] ▼
Dave Harris - sample@gmail.com	[None] ▼

2. Associate the HubSpot users with PBX extensions.

Associate automatically

If users bind the same email address to their HubSpot accounts and PBX extensions, you can implement automatic association of their HubSpot accounts and PBX extensions as follows:

- a. Click the **Associate Automatically** button.
- b. In the pop-up window, click **OK**.
- c. Click **Save**.

Associate manually

If a user binds different email addresses to his or her HubSpot account and PBX extension, you need to manually associate the user's HubSpot account and PBX extension.

- a. In the **Extension** drop-down list beside a desired HubSpot user, select the desired user's extension.
- b. Click **Save**.

Result

- The integration of Yeastar P-Series Cloud Edition and HubSpot CRM is set up.
- HubSpot users can make or receive calls with their PBX extensions.

What to do next

- [Set up Contact Synchronization from HubSpot CRM](#)
- [Set up Automatic Contact Creation for HubSpot CRM](#)
- [Use HubSpot CRM Integration](#)

Set up Contact Synchronization from HubSpot CRM

After integrate with HubSpot CRM, you can enable a one-way contact synchronization on PBX to sync the HubSpot CRM contacts to a specific PBX phonebook.

Prerequisites

The [HubSpot CRM integration](#) is completed.

Procedure

1. Log in to PBX web portal, go to **Integrations > CRM**.
2. On the CRM integration page, select the checkbox of **Synchronize Contacts Automatically**.
3. In the **Synchronize Contacts From** drop-down list, select the type(s) of contacts to be synchronized from HubSpot CRM.

- In the **Synchronize to Phonebook** drop-down list, select an existing empty phonebook or create a new phonebook to store the contacts that will be synchronized from HubSpot CRM.

**Note:**

The contacts can only be synchronized to an empty phonebook.

- Click **Save**.

Result

The associated phonebook comes with a label of **CRM**.

Phonebook Name	Total Contacts	Operations
HubSpot_CRM_Phonebook CRM	0	

When users receive an inbound call from a HubSpot CRM contact, the matched contact information will be synchronized to the Phonebook in Yeastar P-Series Cloud Edition automatically.

**Note:**

This is a one-way sync to Yeastar P-Series Cloud Edition, therefore the associated phonebook and the synced contacts are read-only.

**Troubleshooting:****Fail to synchronize certain CRM contacts?**

Incomplete information of CRM contacts can lead to synchronization failure. Make sure the following fields are filled in for the contacts, then perform the directory synchronization again:

- Either the **First name** or **Last name** field is filled in.
- **Phone number** field is filled in.

Set up Automatic Contact Creation for HubSpot CRM

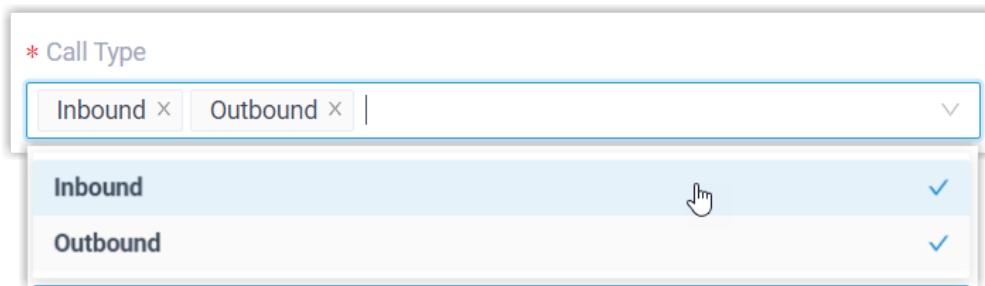

After the integration with HubSpot CRM, you can set up automatic contact creation. If enabled, a new contact will be created on the CRM when the user receives a call from an unknown number or places a call to an unknown number. This feature helps you to build your contact database efficiently and ensure all contact information is captured.

Prerequisites

The [HubSpot CRM integration](#) is completed.

Procedure

1. Log in to PBX web portal, go to **Integrations > CRM**.
2. On the CRM integration page, select the checkbox of **Create New Contact Automatically**.
3. In the **Call Type** drop-down list, select when will a contact be automatically created on HubSpot CRM.

* Call Type

Inbound × Outbound × |

Inbound	✓
Outbound	✓

- **Inbound:** Inbound call from an unknown number that doesn't match a Contact or Company already in the CRM.
 - **Outbound:** Outbound call to an unknown number that doesn't match a Contact or Company already in the CRM.
4. Click **Save**.

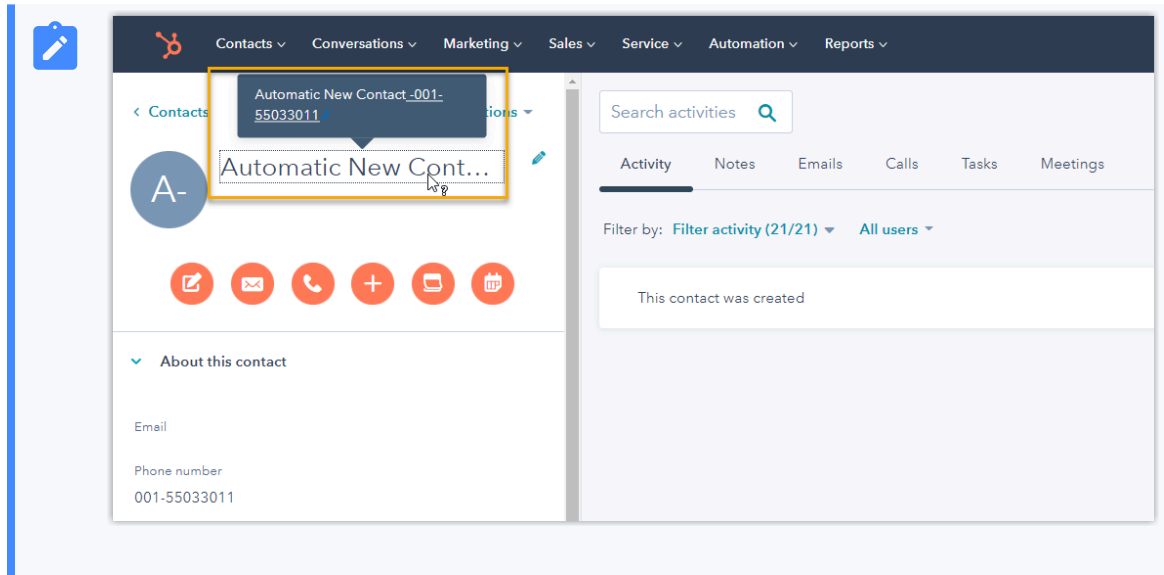

Result

- When a call is placed to an unknown number, or a call is received from an unknown number, a new contact will be created on HubSpot CRM.

Note:

The name of the auto-created contact has a prefix of `Automatic New Contact` followed by the number.

- If the [Contact Synchronization](#) feature is enabled, the new created contact will also be synchronized automatically into the phonebook in Yeastar P-Series Cloud Edition.

<input type="checkbox"/>	Contact Name ↕	Company ↕	Email ↕	Business ↕
<input type="checkbox"/>	Automatic New Contact -001-55033011			001-55033011

Use HubSpot CRM Integration

The integration with HubSpot CRM supports various features for your business dealings, bringing great convenience and efficiency. This topic shows the usage of the key features.

Click to Call

Prerequisites

Install '[Yeastar Linkus for Google](#)' Chrome extension and set up Linkus Web Client to work with the Chrome extension.

Procedure

Users can click on detected phone numbers on the HubSpot CRM web page, a call is then sent out directly via the associated PBX extension.

Call Popup

Prerequisites

Keep at least one of the following clients logged in:

- Linkus Desktop Client
- Linkus Web Client

Note:

If users close web browser or Linkus Web Client tab, they can NOT receive calls. To avoid this, users can install Chrome exten-

sion '[Yeastar Linkus for Google](#)', which allows for the call pop-up browser tab even when web browser is closed.

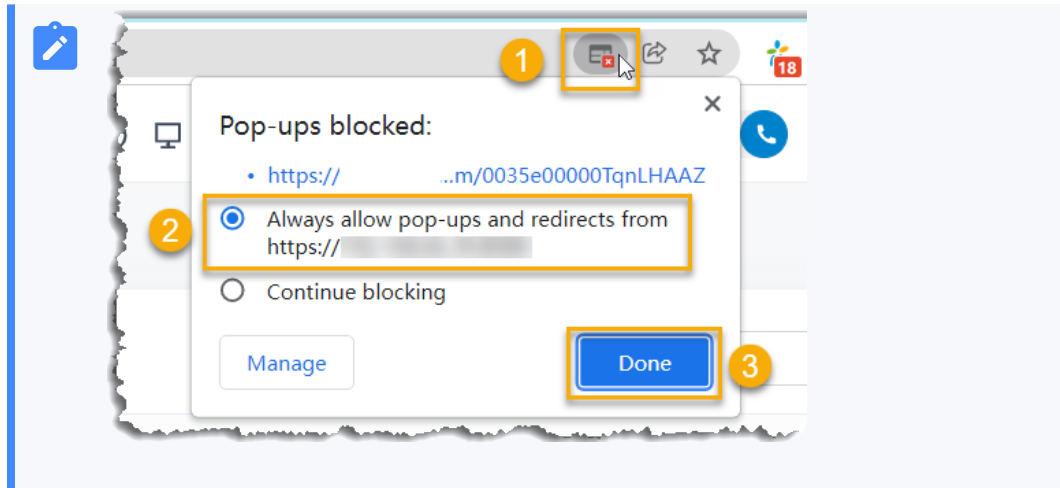

Procedure

When the HubSpot CRM user receives an inbound call from a contact, a new browser tab will be launched to show the CRM contact's information.

Note:

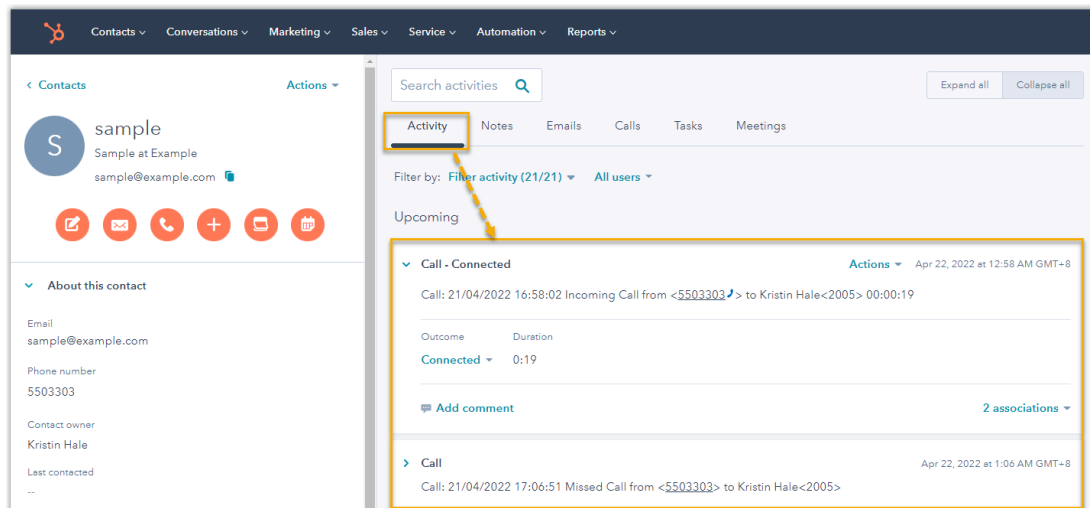

The pop-up web page might be blocked by the browser. In this case, users need to click on the blocked icon at the search bar, allow the pop-up window and website redirection, then click **Done**.

Call Journal

After the HubSpot CRM integration, all outbound calls, incoming calls, and missed call records will be logged to CRM automatically, which helps users to keep track of every conversation.

Users can log in to the HubSpot CRM, go to the **Activity** tab in a contact detail page to view the call logs.

Contact Synchronization

Inbound calls from HubSpot contacts trigger a CRM contact lookup. If there exists the same number in HubSpot CRM, the matched contact will be synchronized to an associated PBX phonebook, and the synchronized contacts are read-only.

For more information, see [Set up Contact Synchronization from HubSpot CRM](#).

Automatic Contact Creation

A new contact will be created automatically in CRM when the HubSpot user receives a call from an unknown number, or when the user makes a call to an unknown number.

For more information, see [Set up Automatic Contact Creation for HubSpot CRM](#).

Disable HubSpot CRM Integration

You can disable the HubSpot CRM integration on Yeastar P-Series Cloud Edition at any time when you want to pause the CRM integration.

Procedure

1. Log in to PBX web portal, go to **Integrations > CRM**.
2. Turn off the **Enable Hubspot Integration** switch on the top.

3. Click **Save**.

Result

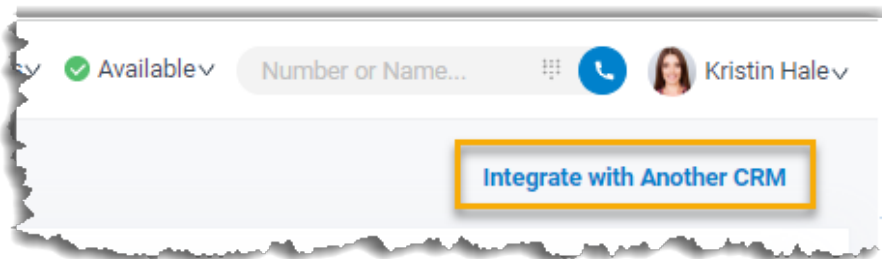

- The **Status** field displays **Disabled**.
- The CRM integration configurations are retained, and can be used directly the next time the integration is enabled again.

Disconnect HubSpot CRM Integration

If you want to integrate with another CRM account, you need to disconnect the current CRM integration first.

Procedure

1. Log in to PBX web portal, go to **Integrations > CRM**.
2. In the top-right corner, click **Integrate with Another CRM**.

3. In the pop-up window, click **OK**.

Result

- The HubSpot CRM integration is disconnected.
- All the CRM integration settings are cleared.
- The synchronized phonebook and contacts are retained on the PBX and can be edited now.
