Safety Disclaimers and Installation Warnings

To avoid unexpected accident, personal injury or device damage, read the safety disclaimers and installation warnings.

Power

- Use only the power cord provided with the Yeastar TA device.
- Keep the power off during the installation.
- Make sure that the supply voltage matches the specifications indicated on the back panel of the device.
- To avoid the electric accident, do not open or remove the cover of device when it is working as well as off the power.
- Before cleaning the device, cut off the power supply.

Environment

Install the Yeastar TA device in a location that is clean, free from vibration, electric shock, and temperature/humidity extremes.

Table 1.

Environment	Requirement
Storage Temperature	-20 to 65°C, 4 to 149°F
Humidity	10% to 90% (non-condensing)
Operation Temperature	0 to 40°C, 32 to 104°F

Packing List

Upon receiving Yeastar TA 1610 gateway, you can open the package and check if all the items are supplied as per packing list.

Connect Yeastar TA Gateway

Follow the steps to connect Yeastar TA1610 FXO VoIP gateway.

1. Connect TA gateway to the Internet

LAN port can be connected to router or PBX.

2. Connect TA gateway to the PSTN

FXO ports can be connected to PSTN.

3. Power on TA gateway

Connect one end of the power cord to the gateway's power port; plug the other end into an electrical outlet.

Connect the TA Gateway (Frame Ground)

Yeastar TA1610 FX0 VoIP gateway supports ground protection. Follow the instructions to connect the TA gateway to the ground.

Warning:

- The ground wire must be installed by the service person.
- Proper grounding (connection to ground) is very important to reduce the risk to the user of electrocution or to protect the TA device from the bad effects of external noise in the case of a lightning strike.
- A permanent connection between ground and the ground terminal of the TA device must be made.

1. Tighten the provided M3*5 screw stud into the grounding port on TA device.
2. Insert an 18AWG grounding wire (user-supplied).

3. Tighten the provided M3 screw nut using a straight screwdriver.
4. Attach the grounding wire to the grounding terminal.
